**The TREE** is a monthly newsletter Published by **TIST Uganda**, a project area of **The International Small Group and Tree Planting Program**.

**MISSION STATEMENT:**

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

**OBJECTIVE STATEMENT:**

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 56,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

**ADDRESS:**

*TIST Uganda.  
 Bushenyi Town, Liberation Road - Kitokye Lane  
 P.O. Box 232, Bushenyi,  
 Uganda, East Africa. Tel: 0772 058 868 / 0773 716960 / 0772360429 / 0783910878

**IN THIS ISSUE:**

- WHAT OUR CARBON TONNES BUYERS ARE LOOKING FOR
- PLANT TREES AND OWN YOUR FUTURE
- CARBON BUSINESS, OUR BUSINESS WITH CAAC
- I AM GLAD FOR TIST TREES AND CO-BENEFITS

## WHAT OUR CARBON TONNES BUYERS ARE LOOKING FOR.

TIST helps farmers participate in the carbon credit business. Farmers receive 70% share of profits from the sales. Profits are created through participating in the carbon business, which involves planting trees and keeping them alive for a long term.

Our carbon buyers are becoming more interested with TIST tonnes. They are impressed by additional work we do to help communities, climate, biodiversity and entire planet. By having women involved as decision makers at all of TIST's activities, buyers know that TIST has the advantage of all of the farmers, not just the men.

TIST groves with variety of indigenous trees help improve biodiversity. Most buyers are today interested with tonnes created from indigenous trees grooves. Some of other buyers are interested with fruits and nuts tree groves. They recognize that fruit and nut trees also help add more income to families as well as improve nutrition.

Many of the buyers like the way TIST conducts its Small Groups and Cluster Meetings. They appreciate that these meetings give a chance to participants to decide on things that are important and beneficial to them. In addition, TIST meetings offer a chance to grow leaders, nurture gifts and talents.

Buyers who are concerned with food security are impressed by those farmers who practice Conservation Farming and compost manure.

Other activities that interest buyers include those farmers who keep bees, do agro forestry, protect their soil, plant trees for fodder, prune their trees

for firewood, and have energy saving stoves, among other Best Practices.

On the other hand, buyers are resisting to buy carbon tonnes from trees that harm environment such eucalyptus; invasive trees such as wattle trees; trees planted as monoculture. They are also concerned with trees that are at risk of being harvested such as pines, Cyprus etc.

As TIST farmers, we need to respond to the needs of our buyers in order to keep our carbon business going on. Carbon buyers have so many options and if we fail to meet their expectations, they will move to the next carbon project/ program.

## PLANT TREES AND OWN YOUR FUTURE.

Allow me say that TIST is a God given gift, because I have gained much ever since I joined TIST. "God given gift" to plant trees and remain yours as a farmer and later get much money.

To be paid for nothing (carbon dioxide) which trees remove from the atmosphere which is even not touchable? Really, I thank everyone who brought the idea like this.

Farmers in all Clusters

1. Let us plant trees which we can get more benefits like fruit trees.
2. Plant tree species which grow well in our local areas.
3. Put up nursery beds to increase the number of trees in our areas.
4. Let everyone give the real information about TIST for everyone in our areas to join groups, register and become a farmer and enjoy the sweet

fruits from TIST.

5. Let us all move and walk TIST values everywhere. Remember:

We are accurate.

We are transparent.

We are mutually accountable.

We are volunteers

We are honest

We use low budget to get big results.

We are servants to each other.

All these are the pillars of TIST.

Note: If we all walk and follow TIST values, we shall make the program to stay strong and expand to every part of the country.

6. Let us carry out Conservation Farming to prevent poverty.

7. Let us put bee hives in our old trees to get honey and money then provide our needs.

8. Let us plant trees of different species.

9. For those who have a small piece of land, plant in the nearest boundary area of your land.

***By Akankwasa Vastine from Rukungiri District-Buhunga Cluster***

## **CARBON BUSINESS, OUR BUSINESS WITH CAAC**

This refers to the process of generating the carbon credits by sequestering the carbon through tree planting and selling those credits to the world market.

Carbon credits: These are measurements of carbon dioxide reductions achieved through activities like tree planting and Conservation Farming.

Sequestering: This refers to the process of capturing and storing carbon from the atmosphere, which is also known as carbon sequestration. The standard unit of carbon credits is metric tons.

Carbon dioxide needs to be removed from the air to protect the Earth's climate.

Carbon business is also a business model of TIST Program.

Clean Air Action Corporation (CAAC) takes all necessary actions to make all carbon reductions (Sequestration) into carbon credits and sell them.

CAAC serves as the parent company of TIST and signs the contract with the Small Group Members that is GHG (Greenhouse Gas) contract.

Clean Air Action Corporation (CAAC) agrees that it will.

- Pay the Small Group as the GHG contract states in Section 6 of the agreement.
- It will accurately maintain the SG information collected for quantification.
- It will make inspection of the Small Group TIST activities regularly.
- It will provide all the quantification information and other relevant information transparency.
- It will facilitate training to develop Best Practices among Small Group members.
- Maintain accurate records and provide access to the Small Group members.

- Quantify the TIST Small Group activities adequately to make the carbon credits marketable.

By Bahati Alex Cluster Servant –Kanungu-Nyamirama Cluster

## I AM GLAD FOR TIST TREES AND CO-BENEFITS

I am by names of EDISON TUMUHEREZE, TIST farmer in a group called Nyakashebeya Tree Planters. I joined TIST in 2014 as a farmer after having been introduced on importance of trees by TIST PROGRAM such as purification of air, soil conservation, medicine, finally acts as a product in carbon business.

I started planting trees and as a result I started getting pre-payments from TIST Program which I started using to increase on my small piece of land to increase on the number of trees. As trees grew bigger to the level of measuring circumference, I began receiving Profit Sharing from TIST project.

Here I tried the way to get natural manure to use for manuring my trees to grow well, I then used the Profit Share I got to buy cattle for production of manure and some portions for school fees.

I have learnt on other TIST co-benefits that adds a lot of value on Profit Share. I am now practicing bee keeping for honey. Finally, I understood that planting indigenous trees will double my Profit Share and I have practiced growing of those trees which are also source of medicine and fruits. I call upon TIST farmers to start practicing planting of indigenous trees. There is a lot we shall benefit from it. Thanks for planting trees.

*By Tumuhereze Edison Nyakashebeya - Tree Planter*

## EKI ABARIKUGURA ORWOYA RWA KABONI BARIKUSHERURA

TIST neehwera abahingi baayo kwe-taba omu rushuuburo rwa kaboni. Abahingi nibatunga ebicweka 70 ahari 100 by'amagoba kuruga omukuguza orwoya. Amagoba nigaruga omu kuguza orwoya kuruga omu kubyara emiti, ekakura kumara obwire buraingwa.

Abaguzi baine omwete omu kugura kaboni yaitu. Nibashemezibwa aha nkora yaitu ei turikuta omu bantu, embeera y'obwire, okurinda ebirikuruga omu bihingwa n'enyamaishwa omunsi yoon. Ahabw'okuta abakazi omu nkora ya TIST yoon, bashangire ngu TIST tiyabashaija bonka.

Okubyara emiti y'enzaarwa nikihwera omu kurinda obuhangwa. Hati abaguzi b'orwoya nibakunda orurikuruga omu miti y'enzaarwa. Abandi nibakunda emiti ey'ebijuma n'eyenjuma. Nibamanya ngu emiti egi neeyongyera aha ntaasya n'endyagye omu maka.

Abaguzi abamwe nibakunda enkora n'enkiiko za TIST eya guruupu enkye n'emikorere yaayo. Nibamanya ngu enkora egi neehereza bamemba boona omugisha ngu buri omwe gurikumugobesa omu guruupu ye. N'okukuza etaranta za ba memba.

Abaguzi abandi nibashemezibwa abahingi okuhingira okurnda eitaka n'okura kasasiro.

Abandi nibashemezibwa okuriisa enjoki, okubyara emiti erikurugamu eby'okurya by'abantu n'eby'amatungo, erikurugamu enku, n'amahega agarikukoresa eku nkye omu bindi bingi.

Abaguzi tibarikukuda kugura orwoya orurikuruga omu miti erikushiiha

eby'obuhangwa nka karituunsi, burikooti nari erikurugamu omugasho gumwe, nari erikusha-ruurwa omurundi gumwe nka pine, kapurisensi n'endiija.

Abashuuburi nibabaasa kuza ahandi twaba tutarikiwegyendesere ebintu ebibarukwenda omu rushuuburo. N'ahabw'ekyo tubikuratire tugume omurushuuburo oru.

### **BYARA EMITI ERINDE NYETSYA YAAWE.**

TIST n'ekihembo kuruga ahari Ruhanga, ahakuba ntungire bingi kwiha nza omuri TIST. Okubyara emiti ekaba eyaawe reeru okaihamu sente yaaheza kukura!

Kiri nk'okushashurirwa busha!, ahakuba nooguza eki otarikureeba kandi orwoya rurikuruga omu mwanya kyonka. Ninyebaza owaatandikire enteekateeka egi.

Abahingi ba guruupu z'empagara

- 1- Reka tubyare emiti erikurugamu amagoba maingi nk'ey'ebijuma
- 2- Tubyare emiti erikukuragye omubicweka byaitu
- 3- Tukore nasare beedi nyingi tubyare emiti mingi omu byanga byaitu.
- 4- Mujanjaaze amakuru ga TIST buri omwe abe memba atungye aha magoba gaayo.
- 5- Twena tугyendere aha mikorere ya TIST. Ijuka ngu ni:
  - Nitukora ebihikire,
  - Nitukora eby'amazima,
  - Nitwesigana,
  - Nitwehayo butakorera mpeera,
  - Nitubeererana ab'amazima,
  - Nitutamu kakye twihamu kihango,

- Buri omwe n'omuheereza wa mutaahi we.

Ezi nizo nyomyo za TIST.

Manya eki: Twakuratira enkora egi, TIST neija kuba ey'amaani kandi ejanjaare omu Uganda yona.

- 6- Reka kuhingira okurinda eitaka turugye omu bworo
- 7- Reka turiise enjoki omu miti yaitu emikuru twihemu entaatsya tuhwerwe.
- 8- Abaine amataka amakye mubyare emiti omu sharasharo.

N'ebya Akankwasa Vastine- Rukungiri- Buhunga Cluster.

### **ORUSHUUBURO RWAITY RWA KABONI NA CAAC**

Eki nikimanyisa okurundaana orwoya kuruga omu miti ei tubyaire tukaruguzwa omu katere k'ensi yona.

Carbon credit: Orupimo kw'okucendeera kwa kabonidiyoxide enyuunyusirwe kuruga omu miti endiijo mirimo nka okuhinga orikurinda eitaka.

Sequestering: Nikimanyisa kukwata kandi okabiika orwoya rwa kaboni kuruga omu mwaya. Kandi nibarupima omu za taani. Orwoya rwa kaboni nirunyuunyutwa kuruga omu mwanya kwenda kurinda embeera y'ensi.

Ekitongore kya CAAC nikitwira obujunaan-izibwa bw'omurimo gw'okunyuunyuta orwoya kandi ruruguzwa omu katere k'ensi yooa.

CAAC niyo erikukora na TIST kugura orwoya kuruga omu bahingi bwanyima y'okukora endagaano ya Green House. (GHG).

CAAC neekora ebi:

- Neeshashura abahingi nk'oku endagaano erikugamba omu nginga ya 6

**ATESO**

- Neebiika amakuru ga za guruupu enkye, egakuuma gye.
- Neeguma neerambura emikorere ya za guruupu ezi.
- Neehereza kandi erinda amakuru aga omu bwesigwa.
- Neetendeka kandi eshomesa ba memba ba za guruupu.
- Neebariirira gye ebirukuruga omu biba-zirwe kuruga omu guruupu ahabw'orushuuburo rwa kaboni.

- Tuli banakyewa.
- Tuli besimbu.

### KISWAHILI

#### NINI KYENYE WANUNUZI WETU YA MATANI ZA HEWA-KAA WAIKOOWANATAFUTA.

TIST husaidia wakulima kushiriki katika biashara ya Hewa-kaa. Waku-  
lima wanapata Racimia sabini (70%) ya faida ya mauzo kutoka kwa mauzo.

Faida zinaundwa kupitia kushiriki katika biashara ya Hewa-kaa, am-  
bayo inahusisha kupanda miti na kuwaweka hai kwa muda mrefu.

Wanunuzi wetu wa Hewa-kaa wanavutiwa na matani za TIST.

Wanavutiwa na kazi ya ziada tunayofanya ili kusaidia jamii, hali ya  
hewa, biodiversity na sayari nzima.

Kwa kuwa na wanawake wanaohusika kama wafanya maamuzi katika  
shughuli zote za TIST, wanunuzi wanajua kwamba TIST ina faida ya  
wakulima wote, si tu watu.

Mashamba za Tist Kwa aina mbalimbali za miti ya asili husaidia  
kuboresha viumbe hai.

Wanunuzi wengi leo wanavutiwa na gesi iliyoungwa kutoka kwa miti  
ya asili ya mimea. Baadhi ya wanunuzi wengine wanavutiwa na ma-  
tunda na miti zamizabibu.

Wanatambua kwamba miti ya matunda na nut pia husaidia kuongeza  
mapato zaidi kwa familia na kuboresha lishe.

Wengi wa wanunuzi kama njia ya TIST hufanya vikundi vyake vidogo  
na mikutano ya nguzo.

Wanaa thamini ya kwamba mikutano hii inatoa fursa kwa washiriki  
kuamua juu ya mambo ambayo ni muhimu na ya manufaa kwao.

Kwa kuongezea/aidha, mikutano ya TIST hutoa nafasi ya kukua vion-  
gozi, kukuza zawadi na vipaji.

Wanunuzi ambao wana kijali na usalama wa chakula wanavutiwa na  
wakulima hao wanaofanya mazoezi ya kilimo kya uhifadhi na kuoze-  
sha mbolea.

Shughuli nyingine ambazo zinavutia wanunuzi ni pamoja na walef  
Watazamaji ambao wanaweka nyuki, kilimo kya mseto wa kilimo, ku-  
linda udongo wao, kupanda miti kwa ajili ya chakula, kukatilia miti yao  
kwa ajili ya kuni, nakuwa na jiko mpishi ya kuokoa nishati, Miogoni  
mwa mazoea mengine bora.

Juu Hadithi nyingine, wanunuzi wanakataa kununua Hewa-kaa kutoka  
kwa miti ambayo hudhuru mazingira kama mikaratusi; miti mbaya  
kama vile miti ya utoto; Miti iliyoungwa kama kilimo kimoja.

Pia wanahusika na miti ambayo ni wakati Hatari ya kuvuna kama vile  
piine, miti za michungwa.

Kama wamkulima wa TIST, Sisi tunahitaji kujibuka kwa mahitaji ya  
wanunuzi wetu ili kuweka biashara yetu ya Hewa-kaa ina endelea.

Wanunuzi wa Hewa-kaa wana uchaguzi nyingi na ikiwa tunashindwa  
kufikia matarajio yao, watahamia kwenye mradi wa pili wa Hewa-kaa/  
mpango zingine.

#### PANDA MITI NA UMULIKI MAISHA YAKO YA BAADAYE.

Niruhusu kusema yakwamba TIST ni Mungu aliye pea zawadi, Kwa  
sababu nimepata mengi tangu nilijiunga kwa TIST.

“Mungu alipea zawadi” kupanda miti na kubaki yako kama mkulima na  
baadaye kupata pesa nyingi.

Ili kulipwa kwa chochote (kaboni dioksidi-hewa mbaya) ambayo miti

□ Tukoseza kitono tufune kinene. Tuli mubuwereza eri buli muntu.

Biino byonna zempagi za TIST.

Singa ffena tugoberera emiramwa gya TIST, tujja kusobozeza pulogulamu  
okuwangala era egaziwe mugwanga lyona.

nunda njuki nfunne omubisi. Njize nti okusimba emiti gyanasagwa kikubyamu  
emirundi amagoba Era kati nsimba emiti egivako edagala ne babala. Mpita  
abalimi ba TIST okutandika okusimba emitigyanasagwa. Bingi byetujja okug-  
anyurwamu. Mwebale kusimba miti.

huondoa kutoka anga ambayo haipatikani kabisa?Kweli, Mimiasante kila mtu aliyetea mimi mawazo kama hii.

Wakulimakwa katika nguzo zote

1. Hebu sisi tupande miti ambayo tunaweza kupata faida zaidi kama miti ya matunda.
2. Panda Aina ya miti ambayo inakua vizuri katika maeneo yetu ya ndani.
3. Weka vitanda vya kitalu ili kuongeza idadi ya miti katika maeneo yetu.
4. Hebu Kila mtu anatoa habari halisi kuhusu TIST kwa kila mtu katika maeneo yetu kujiunga kwa vikundi ,Kujiandikisha na kuwa mkulima na kufurahia matunda mazuri kutoka kwa TIST.

5. Hebu sote tuende na kutembea na thamana za TIST kila mahali. Kumbuka:

Sisi nisahihi.

Sisi niuwazi.

Sisi ni pande zote kuwajibika.

Sisi ni wajitolea

Sisi ni waaminifu

Tunatumia bajeti ya chini ili kupata matokeo kubwa .

Sisi ni watumishi kwa kila mmoja.

**Haya yote ni nguzo za TIST.**

Kumbuka: Ikiwa sisi sote tunatembea na kufuata maadili ya TIST, sisi tutafanya mpango wa kukaa nguvu na kupanua kila sehemu ya nchi.

6. Hebu tufanye ulimaji wa uhifadhi ndie tuu zuia umasikini.

7. Hebu tuweke mizinga za nyuki katika miti yetu ya zamani ili tupate asali na pesa kisha kutoa mahitaji yetu.

**Na AkankwasaVastine kutoka Wilaya ya Rukungiri- nguzo ya Buhunga.**

**Biashara ya Hewa-kaa, Biashara yetu na caac**

Hii ina ruhusu mchakato wa kuzalisha mikopo ya Hewa-kaa kwa kunyonya Hewa-kaa kupitia kupanda miti na kuuza mikopo kwa soko la dunia.

Mikopo za Hewa-kaa:Hizi ni ulimaji wa Hewa-kaa mbaya(kabondioksidi) upungusaji imefanikiwa kupitia shughuli kama upandaji wa miti na ulimaji wa uhifadhi.

Kunyonya:Hii ina husu mchakato wa kukamata na kuweka Hewa-kaa kutoka anga,ambayo pia ina julikana kama ufuatiliaji wa Hewa-kaa.

Kiwango cha mikopo ya Hewa-kaa nii Taasisi za matani kwa wingi

Hewa mbaya (kabondioksidi)inahitaji kuondolewa kutoka angani ndie tuulinde hali ya hewa ya dunia mzima.

Biashara ya Hewa-kaa pia ni mfano wa biashara wa mpango ya TIST.

Shirika ya hatua ya hewa safi (CAAC) ina chukuavitendo vyote

muhimu ili ifanye kupunguza Hewa-kaa (Kusafisha) Katika mikopo ya Hewa-kaa na kuziuzuza.

CAAC hutumikia kama kampuni ya mzazi wa TIST na ina weka sahihi kwa mkataba na Wanachama wa kundi ndogo ambao ni GHG (gesi ya chafu) mkataba.

Shirika ya hatua ya hewa safi (CAAC) Ina kubaliana ya kwamba fanya hivi:-

- Kulipa vikundi ndogo kama mkataba wa GHG vile ina ongelewa katika kipindi kya mkataba wa 6 wa makubaliano.
- Ita kuwasahihi kudumisha Habari ya SG imekusanywa kwajili ya kuesabika na kupimwa.
- Ita fanya uchungusaji ya kundi ndogo katika shughuli za TIST mara kwa mara.
- Ita toa taarifa zote za upimamwaji na kuesabika na uwazi mwingine wa habari muhimu.
- Ita weza kusimamia mikutano kwajili ya maendeleo ya mazoezi Bora katika Wanachama wa kundi ndogo.
- Weka rekodi sahihi na utoe upatikanaji ya Wanachama ya kundi ndogo .
- Kuhesabu shughuli za kundi ndogo za TIST kwa kutosha kufanya mikopo Hewa-kaa ipatee sokoni haraka.

Na Bahati Alex Mtumishi wa nguzo -wilaya Kanungu- nguzo ya Nyami-rama.

Mimi Nina furahi kwajili ya miti zaTIST na faida ya mara mbili.

Mimi ni kwa majina Edison Tumuhereze,Mkulima wa TIST katika kikundi kinachoitwa Wapandaji wa miti ya Nyakashebeya.

Nili jiunga kwa TIST mwaka 2014 kama Mkulima baadae Nili juliswa juu ya umuhimu wa Miti kupitia kwa mpango ya TIST kama vile utakaso wa hewa, udongo uhifadhi,Dawa, Hati maye hufanya kama bidhaa ndani Biashara ya Hewa-kaa.

Vile miti ilie komea kuakubwa kwa kiwango cha kupimwa mviringo, nilianza Kupokea faida yangu ya shirika kutoka kwa mradi TIST.

Hapa nili jaribu njia ya kupata mbolea ya asili kutumia kwa ajili ya kuendesha miti yangu kukua vizuri, basi nikatumia faida ya shirika Nili pata kununua mangoombe kwa ajili ya uzalishaji wa mbolea nabaadhi ya sehemu zingine nikatumia kulipia shule.

Nime funzwa kuusu Faida zingine za mara mbili za TIST zenye na ongezea thamana kwa kushiriki faida.

Sasa ninafanya mazoezi ya kuchunga nyuki kwajili ya asali.

Hatimaye,Niliealewa hilo kupanda miti za Asili itakuwa faida mara mbili kawa ngu Na nimefanya maendeleo ya miti hiyo ambayo pia ni chanzo cha dawa na matunda.

Nina ita wakulima wa TIST kuanza kufanya mazoezi ya kupanda Miti za asili.

,tuta pataa kufaidika kwa mengi zaidi

Shukrani kwa kupanda miti.
