Seedlings ready for planting during rain season in Bugangari-Rukungiri

The TREE is a monthly newsletter Published by **TIST** Uganda, a project area of **The International Small Group and Tree Planting Program**.

MISSION STATEMENT:

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

OBJECTIVE STATEMENT:

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 79,200 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

TIST IS MOVING FAST TO FIX DELAY OF FARMERS PAYMENTS

Dear Members,

This is a calling to participants to embrace TIST program.

TIST Uganda puts trust on the farmers, as the foundation of the program.

Farmers are the first stakeholders in the line-up.

Therefore, they deserve prompt payments.

However, findings have proven that delay of payments is, in most cases, caused by farmers.

As a farmer, you are asked to;

- Register a Small Group and sign GHG contract form.
- Plant indigenous trees as in line with the program and as trained by CS.
- Maintain your grove clean so that it's easier to quantify and for subsequent yearly updates.
- Farmers are to coordinate with area CS for better programming of the Small Groups in a particular Cluster.
- Cluster Servants are very important Ladies and Gentlemen. These are officers of integrity that are carefully recruited. There's need to build trust in them.
- Much as there's need for cooperation, stakeholders must be Honest - (authenticity), with Empathy - (accountable to one another), and
- Work with Logic - (Accuracy and use of Low budget).

Among other things.

I believe, we shall move fast and fix the outcry of delay of farmers payments.

Thank you TIST Leadership, team leader's regional leaders, together we can serve farmers.

By Alex Oile: -CS Kalaki & Amuria Districts.

TIST IS IMPROVING FARMERS LIVELIHOOD

TIST program is majoring in planting indigenous tree species basically with subsistence farmers in rural and dry areas. It is only TIST program that is only "transparent" "trustworthy" "accurate" "accountable to each other". It's through these values that have made TIST to develop and make itself sustainable. It is only TIST among all other carbon business companies that have helped farmers to improve their farming methods mostly with Conservation Farming and health improvement through health trainings.

Through all the above, people have started from subsistence farming to commercial farming which have made them take a step ahead in development. Grow trees through TIST program and make your own change and community development "I am proud of TIST." Let us join TIST for the betterment of our lives and community at large.

By Mbabazi Maritazari-CS Mitooma-Kiyanga Cluster

MITIGATION STRATEGIES AGAINST LANDSLIDE DISASTER

Disaster mitigation means reducing the risk of loss from the occurrence of a disaster. There are three categories of disaster mitigation: avoidance, minimization, and compensatory mitigation.

Kasese district in Uganda is no stranger to the devastating effects of natural disasters, particularly mud/landslides and floods. It has become a common occurrence that every rainy season brings with it a new wave of disasters. These recurrent events have posed significant challenges to the local communities, who are proactively developing strategies to combat their impacts.

Some of the key mitigation measures should be employed include:

- The early warning and early action systems, whereby residents must be trained to recognize the signs of impending disasters, such as heavy rainfall or soil instability, increasing water volumes in rivers, and rolling stones, to equip them with the knowledge about taking immediate action to safeguard their lives and

property.

□ Additionally, the use of whistle-blowing mechanisms can enable community members to alert authorities and neighbouring communities of imminent threats, allowing for a more coordinated response.

□ Tree-planting. TIST Cluster Servants are training communities in disaster-prone areas of Kasese district to prioritize long-term avoidance/minimization mitigation measures, with a particular focus on tree planting. Tree species known to be suitable for the mountainous terrain, especially the tree species in the indigenous families and genera, have to be planted in the areas of Kyondo, Mahango, Kyarumba, and Bugoye in Kasese district where the mudslides recently claimed 13 lives and displaced hundreds, with massive destruction of property.

These tree-planting efforts will not only help to stabilize the soil and prevent landslides but also contribute to the overall resilience of the ecosystem. As communities continue to navigate the challenges posed by natural disasters, the integration of early warning systems, community-based preparedness, and long-term mitigation strategies like tree planting are vital components in disaster mitigation and management approaches.

By Noel Mwebaze, Cluster Servant - Kitwamba Cluster, Kasese District

.TIST IS COMMITTED TO SERVE FARMERS BETTER

Dear TIST farmers, as we prepare to pay 2023 Profit Share, we are glad to announce to you that your payment receipts that you signed are well received and are being taken care of.

Cluster Servants, team leaders and the Leadership team are fixing issues as far as inaccurate data is concerned that was detected in many Small Groups that were ready for payments.

In order to have prompt payments and resolve the delayed payments, TIST has embarked on the collection of the missing information during 2023 Profit Share payments, so that by next year all the groups can qualify for 2024 Profit Share.

TIST Tech support staff, CS and Leadership are working hard fixing all the errors to resolve delayed payments and this is done through collecting minimum evidence from Small Group members who signed receipts.

The minimum evidence includes national identification photocopies, signatures of the members on the receipts and GHG, names of the members on the receipts, names of the members on GHG, names of the members in the registration form in the system and names of the members whose trees were quantified.

The inaccurate data identified include missing or bad tracks: If your Small Group has bad or missing tracks, it won't qualify for payments, as this is one of the requirements for having accurate data. This also helps to mark the grove boundary, location and area.

Missing GHG for some groups, especially members whose trees got quantified, their names not matching with registered members in system, and members who signed receipts not matching with names of members whose trees got quantified.

Missing baseline information (partial data in the system): Baseline information is very vital for the success of the program. When the baseline information is missing (information about Displacement and Deforestation) the Small Group may not be eligible for payments.

It's our humble request that as we look for the required information to fix issues so that your Small Groups get paid quickly, TIST needs your support as a farmer to help the CS get the required information about your Small Group and minimum evidence so that your group qualifies for Profit Share payments.

The good news is that all the groups whose information is right and have minimum evidence have started receiving payments.

Let's all work together to serve each other in a better way for the future success of the program.

TIST inahamia haraka ili kurekebisha ucheleweshaji wa malipo ya wakulima

MpendwaWanachama,

TWake ni wito kwa washiriki kukubalianaTistmpango.

TIST Uganda inaweka uaminifu juu yaVita, kama msingi wa mpango.

Wakulima niwadau wa kwanza katika mstari-up.

Kwa hiyo,waolnastahili malipo ya haraka.

Hata hivyo, matokeo yameonyesha kuwa kuchelewa kwa malipo ni,katika hali nyingi,unasababishwa na wakulima.

Kama mkulima, unaulizwa;

Jisajili kundi ndogo na sahihi ya fomu ya mkataba ya GHG

Panda miti ya a sili kama kkulingana mpango na mafunzo Za CS.

- Kudumisha shamba ⁸ safi ili iwe rahisi kupima na kwa sasisho za kila mwaka.
- Wakulima ni kuratibu na eneo la CS kwa pmpanjo bora ya Kundi mhu of d thekwa fulaniCluster.
- Watumishi wa kikundi ni wanawake muhimu sana naMabwana. Hizini maafisa wa uaminifu ambao wanaajiriwa kwa makini. Kuna haja ya kujenga imani ndani yao.
- Vile vile kuna haja ya ushirikiano, wadaulazimaKuwa waaminifu -(Ukweli), kwa huruma- (Kuwajibika kwa mtu mwingine), na
- Kazi na mantiki- (usahihi na matumizi ya bajeti ya chini).

Miongoni mwa mambo mengine.

Ninaamini, tutahamia haraka na kurekebisha kilio cha kuchelewafMalipo ya wakulima.

Asante kiongozi wa TIST,, timukiongozi waViongozi wa Mkoa, pamoja tunaweza kuwahudumia wakulima.

Na AlexOile: -CsKalaki & Wilaya za Amuria.

TIST inaboresha maisha ya wakulima

Mpango wa TIST ni mkubwa katika kupanda miti ya asili ya asili kwa wakulima wa kudumu katika maeneo ya vijijini na kavu. Ni tuMpango wa TIST ambao ni "uwazi" tu "wa kuaminika" "sahihi" "unajibika kwa kila mmoja". Nikupitia maadili hayaambayo inaalifanya TISTkwa Develop na kujifanya endelevu.Ni TIST tu kati ya makampuni mengine ya biashara ya kaboni ambayo yame-saidia wakulima kuboresha mbinu zao za kilimo hasaConservationFUboreshaji wa silaha na afya kupitia mafunzo ya afya.

Kupitia yote hapo juu, watu wameanza kutoka kwa kilimo cha kilimo kwa kilimo cha biashara ambacho kimewafanya wafanye hatuambelemalele. Kukua miti kupitia mpango wa TIST na kufanya mabadiliko yako mwenyewe na maendeleo ya jamii "NinajivuniaTIST. "Hebu tujiunge na TIST kwa ajili ya uboreshaji waletuMaisha na jamii kwa ujumla.

Na Mbabazi Maritazari-CS Mitooma- nguzo ya Kiyanga

Mikakati ya kupunguza dhidi ya maafa ya ardhi

Kuzuia maafa kunamaanisha kupunguza hatari ya kupoteza kutokana na tukio la maafa. Kuna makundi matatu ya kukata tamaa: kuepuka, kupunguza, na kupunguza fidia.

Wilaya ya Kasese kwa nchi ya Uganda sio mgeni kwa madhara makubwa ya majanga ya asili, hasa matope / maporomoko ya ardhi na mafuriko. Imekuwa tukio la kawaida ambalo kila msimu wa mvua huleta na wimbi jipya la majanga. Matukio haya ya kawaida yamesababisha changamoto kubwa kwa jumuiya za mitaa, ambao wanaendelea kuendeleza mikakati ya kupambana na athari zao.

Baadhi ya hatua muhimu za kupunguza lazima ziajiriweni pamoja na:

□ Onyo la awali na mifumo ya mapema, ambayo wakazi wanapaswa kufundishwa kutambua ishara za majanga yaliyotarajiwa, kama mvua nzito au kutokuwa na utulivu wa udongo, kuongezeka kwa kiasi cha maji katika mito, na mawe ya kuzunguka, kuwapatia ujuzi kuhusu kuchukua hatua ya haraka ili kulinda yao Maisha na Mali.

□ Zaidi ya hayo, matumizi ya mifumo ya kupiga kelele inaweza kuwawezesha wanachama wa jamii kuwaonya mamlaka najiranjamii ya vitisho vya karibu, kuruhusu majibu ya kuratibu zaidi.

□ Upandaji wa miti. Watumishi wa nguzo za TIST Wahamiaji na mafunzo ya jamii katika maeneo ya kukabiliwa na maafa ya wilaya ya Kasese ili kuzuia hatua za kuzuia muda mrefu / kupunguza hatua za kupunguza, kwa kuzingatia hasa kupanda miti. Aina ya miti inayojulikana kuwa yanafaa kwa ajili ya ardhi ya milimani, hasa aina ya mti katika familia za asili na genera, zinapaswa kupandwa katika maeneo ya Kyondo, Mahango, Kyarumba, na Bugoye katika wilaya ya Kasese ambapo Mudslides hivi karibuni alidai maisha 13 na mamia waliokimbia, na uharibifu mkubwa wa mali.

Jitihada hizi za kupanda miti hazitasaidia tu kuimarisha udongo na kuzuia maporomoko ya ardhi lakini pia huchangia kwa ustahimilivu wa mazingira. Kama jumuiya zinaendelea kusafiri changamoto zinazosababishwa na majanga ya asili, ushirikiano wa mifumo ya onyo ya mapema, utayarishaji wa jamii, na mikakati ya kupunguza muda mrefu kama kupanda miti ni vipengele muhimu katika matatizo ya kuzuia maafa na usimamizi.

Na Noel Mwebaze, mtumishi wa nguzo - nguzo ya

Kitswamba , Wilaya ya Kasese

.TIST imejitolea kutumikia wakulima vizuri na ubora

Wapendwa wa wakulima wa TIST, Tunapojiandaa kulipa 2023 kushiriki faida, tunafurahi kukutangaza kwamba risiti zako za malipo ambazo umesaini zimepokea vizurinawanachukuliwa.

Watumishi wa kikundi, viongozi wa timu ya wa viongozi ni kurekebisha masuala kwa mbaliData inahusika na kwamba iligunduliwa katika vikundi vingi vidogo ambavyo vilikuwa tayari kwa malipo.

Ili kuwa na malipo ya haraka na kutatua malipo ya kuchelewa, TIST imeanzisha ukusanyaji wa habari zilizopo wakati wa malipo ya faida ya 2023, ili kwa mwaka ujao vikundi vyote vinaweza kustahili kushiriki faida kwa 2024.

Wafanyakazi wa msaada wa TIST, CS na uongozi wanafanya kazi kwa bidii kurekebisha makosa yote ili kutatua malipo ya kuchelewa na hii inafanywa kwa kukusanya ushahidi mdogo kutoka kwa wanachama wadogo wa kikundi ambao walisaini risiti.

Ushahidi wa chini unajumuisha picha za kitaifa za kitambulisho, saini za wanachama kwenye risiti na GHG, majina ya wanachama kwenye risiti, majina ya wanachama wa GHG, majina ya wanachama katika fomu ya usajili katika mfumo na majina ya wanachama ambao miti yao ilipimwa.

Kitambulisho cha data/habari isiyo sahihi Jumuisa habari zilizo potea au mbaya: Ikiwa kikundi chako kidogo kina nyimbo mbaya au zisizopotea, haifai kustahili malipo, kama hii ni moja ya mahitaji ya kuwa na data/ habari sahihi. Hii pia husaidia kuashiria mipaka ya shamba, na eneo.

Kukosa GHG kwa baadhiVikundi, hasawanachama ambao-Je, miti hiyo imethibitishwa, majina yao siovinavyolingana na wanachama waliosajiliwakatika mfumo,nawanachama ambao walisainiMapokezi hayafanani na majina ya wanachama ambao miti yao imethibitishwa.

Maelezo ya msingi ya msingi(sehemuTakwimu katika mfumo): Taarifa ya msingi ni muhimu sana kwa mafanikio ya programu. Wakati habari ya msingi haipo (habari kuhusu uhamisho na ukataji miti) kikundi kidogo hawezi kustahili malipo.

Ni ombi letu la unyenyekevu kwamba tunapotafuta habari zinazohitajika ili kurekebisha masuala ili makundi yako madogo yapatiwe haraka, TIST inahitaji msaada wako kama mkulima kusaidia CS kupata taarifa zinazohitajika kuhusu malipo ya kushiriki.

Habari njema ni kwamba makundi yote ambayo habari ni sahihi na kuwa na ushahidi mdogo wameanza kupokea malipo.

Hebu tufanye kazi pamoja ili kutumikia kwa njia bora zaidi ya mafanikio ya baadaye ya mpango.
