TIST is an innovative, time - tested, afforestation program led by the participants.

TIST: Cluster Leaders seminar held March 24 - 28, 2025 in Ruiru, Kenya.

TIST: Important Reminder – New Groups, New Groves, New Trees.

When NEW farmers join TIST, they often ask whether their existing trees in their farms will be counted as TIST Trees for Carbon business. The answer to this is **NOT YET!** Right Now - New Groves should have New Trees.

Carbon projects are initiatives designed to reduce, avoid or remove Greenhouse gas (GhG) emissions from the atmosphere. In some cases, these projects generate **carbon credits** that can be sold in compliance and voluntary markets and earn revenue/income for the project.

There are many categories for different carbon projects. Examples are

1. Afforestation, Reforestation (A/R) carbon project – TIST
2. Reducing Emissions from Deforestation & Degradation (REDD+)
3. Energy Efficiency projects such as Cookstoves
4. Soil carbon Sequestration e.g. adopting Conservation Farming
5. And many more.

TIST currently operates under Afforestation, Reforestation (A/R) carbon project. This category requires the project to plant NEW trees (afforestation) or restoring forests (reforestation) in areas where forests were previously absent or degraded.

In other words, in order for TIST members to earn Carbon Credits, they need to establish new forests (Groves) on non-forested land (afforestation) or replanting trees in deforested or degraded areas (reforestation) in areas that were not a forest in the last 10 years. To earn carbon credits under this category, the carbon Accounting measures look at the amount of carbon removals from the atmosphere as trees grow.

To summarize, in order for your Trees to qualify for A/R carbon credits, you should plant new trees when you join TIST. In the same note, if you establish a new TIST Grove, that Grove should also have new trees.

It is important to note TIST gets audited by international Verifiers who must ensure we are adhering to the rules under Afforestation, Reforestation (A/R) methodology. Today, the world technology is so advanced that people in faraway continents can know when your trees were planted. If one farmer is caught cheating, all of TIST suffers.

Therefore, let's all remain Honest, Accurate and Transparent in our TIST and other daily activities. When a Cluster Servant visit your farm, let them know the Accurate age of your trees. If some of them were planted before the Small Group knew about TIST, will be considered **Baseline Trees**. TIST is now working to develop the ability to have the Baseline Trees also count toward carbon credits. We will keep you informed as we make progress!

We should ALL help others TIST Farmers understand Carbon Business.

TIST: Leadership and Governance in your Cluster.

Today, TIST has more than 400 Clusters. In each Cluster, Servant Leaders support our success and share their strengths. Each Cluster has governance and leadership as follows:

Elected Cluster Leadership:-

- Cluster Leader.
- Cluster Co-leader.
- Cluster Accountability Person.

Cluster Leaders, Co-leaders, and Accountability Person serve in each position for a period of four months. After four months of service, the Cluster Leader rotates out. The Co-leader becomes the Leader, while the Accountability person becomes the Co-leader.

Women and men alternate in the elections. If the Accountability Person is a man, the next one elected will be a woman. Your Cluster should democratically elect a new Accountability Person. Cluster elections are important and mandatory for all TIST Clusters.

Role of Cluster Leadership.

Role of a Leader.

- 1) Should be a servant to the whole Cluster and exemplify TIST Values.
- 2) Leads/facilitates Cluster activities: coordinates Cluster meeting, quantification, and training schedules with other servant leaders.
- 3) Motivates groups to achieve big results, especially planting trees, using TIST Best Practices like CF.

- 4) Helps the Cluster to remain strong and united.
- 5) Helps plan for well-organized Cluster meetings with other servant leaders and making sure the meetings are properly led and trained.
- 6) Works with Accountability Person to ensure that Cluster Meeting and Accounting records are kept properly.
- 7) Works with Accountability Person and Cluster Servant to ensure monthly Cluster reports and Account reports are accurate and sent.
- 8) Helps recruit and train more Small Groups to be registered.
- 9) Helps Small Groups have their Greenhouse Gas contracts signed, scanned, and uploaded, if necessary.
- 10) Welcomes and introduces any new visitor who might attend the meeting.
- 11) For payments, they get vouchers and other materials ready before Cluster meetings. Works with Accountability Person to make sure the proper payment process is followed, and communicates any questions or problems to TIST leaders and Cluster Servants. They remind Small Group members of the next meeting.

Role of an Accountability Person.

- 1) Receives Cluster Budget and announces amount received and spent at each Cluster meeting.
- 2) Works with the Cluster to plan how to use the Cluster Budget to achieve big results.
- 3) Keeps and maintains Cluster records in an organized Cluster record book, accurately and in proper condition.

- 4) Allows inspection of Cluster records by Cluster members and TIST leaders.
- 5) Organizes with Cluster Servant to send both Monthly Cluster meeting and Accounting reports every month.
- 6) Trains the next accountability person.
- 7) Helps and supports other servants to serve the Small Groups.
- 8) During payments, they hand out vouchers to groups with at least two members present, review vouchers, communicate with payment support coordinators, and follow the payment process accurately and honestly.
- 9) Evaluates Quality of Cluster Trainings and reports to GOCC.
- 10) Attend GOCC meetings as Cluster Council Representative.

Role of a Co-leader

- 1) Takes over when the Leader is not there, while the Co-leader is to serve both the Cluster members and the Cluster leader.
- 2) Helps keep time during Cluster meetings.
- 3) Takes records during the Cluster meetings.
- 4) Read the previous minutes to the meeting and keep record of the minutes and discussion held in the Cluster.
- 5) Helps train newly elected Accountability People.
- 6) Evaluate quality of Cluster Trainings and report to GOCC.

- 7) Attend GOCC meetings as Cluster Council Representative.

Role of Group of Clusters Council Representatives.

- 1) Discover and share Best Practices from Clusters.
- 2) Assure high quality training for the Clusters following TIST Values.
- 3) Assure high quality quantification following TIST Values.
- 4) Maintain working equipment for training and quantification.
- 5) Report concerns and make recommendations for policies to the Leadership Council.
- 6) ExpandTIST through present Clusters.
- 7) Hold Administrative Hearings if a Cluster Servant is suspended, to investigate facts and make recommendations on suspension.
- 8) Hold Administrative Hearings if a Cluster Leader is not following TIST Values.
- 9) Recommend people from the Group of Clusters for additional TIST responsibilities such as Auditor,TSE, or Master Trainer and other responsibilities.
- 10) Receive Quality of Training Evaluation reports and send them to the Leadership Council.

TIST: Small Group Techniques: Group interaction.

a) **What is the best way to arrange people during a Small Group meeting?**

A small circle is the best. Don't have a table because it creates barriers between people. Don't have a chair and a large seat for the most important person. In TIST, we all sit the same way. We either all sit on the ground, or we all sit on chairs.

b) **What do you do if more than twelve people want to join your group?**

If there are more than twelve people interested in joining your group, it is best to form a new group. The group can multiply with two, or three or four members of the original group forming the core of the new group. This is better than one member trying to start a group alone. Remember to start using rotating leadership straight away.

c) **What techniques can you use if the group energy is low?**

Split up the group into pairs and get each pair to talk about the task. Dramas also help.

Sometimes stopping and each person saying something good that their group is doing can also motivate people again. Also remember to keep the meeting from becoming too long. By having a Co-leader who is keeping time, you can focus the group's energy on making sure the work gets done in the agreed upon time period.

Meeting Schedule:

To manage time well, a Small Group should have a well-organized meeting schedule. This is important because it will help you keep focus on your agenda and the most important activities. It is also important because in TIST, we commit to work together for the long-term to improve our farms and grow and maintain our trees for the carbon market. We need to know our fellow Small Group members well, since each person's actions impact our whole group and all of TIST.

It is important, too, for your Small Group to have regular meetings, preferably once a week

or once in two weeks. This will give all members in your group an opportunity to strengthen your group and share and learn new ideas.

During your meeting, it is necessary to focus on important issues. Many TIST Small Groups have found the process below as a Best Practice for successful meetings:

Step I. Greetings and introductions for any new members (5 – 15 minutes):

Make sure everyone feels welcomed. Make it brief but let each person introduce him or herself.

Step II. Opening prayer (2 minutes):

A short word of prayer can help the group unite.

Step III. Songs (5 minutes):

These could be songs written by your group, or songs that encourage people such as religious songs.

Step IV. Agreement on task and time (5 minutes):

The meeting's leader explains what was planned for the meeting and the group members discuss and then agree on what the agenda should be. The time spent on each task or discussion should be agreed so that the co-leader can help keep the meeting on time.

Step V. Group work on tasks (1 hour):

Ideally, tasks should have been discussed at the end of the last meeting. Tasks might include sharing what each person has done to help TIST activities, sharing Best Practices, training on some subject of interest, and any other important issue that will help your Small Group to prosper.

Step VI. Kujengana (5 minutes):

Each group member makes one positive, specific statement to that week's leader about his or her observable leadership of the meeting. In addition, anyone may identify a gift seen in the leader.

Step VII. Closing prayer (2 minutes)

TIST: Trees make the environment better for us all.

In TIST, we plant trees to take part in the carbon market and earn income from carbon-offset sales. However, the other benefits of trees are enormous!

Here are just a few benefits we (and the rest of the world) enjoy:

- Trees serve as natural habitat to support a wide variety of flora and fauna. They provide a sense of privacy and security to wildlife seeking shelter in the woods and provide them with food. Protecting biodiversity makes our farms and our planet more productive and resilient to climate change and other challenges.
- Trees improve the quality of air and reduce dangerous pollution. Trees remove excess carbon dioxide and air pollutants including sulfur dioxide, ozone, and nitrogen oxide. In return, they give us oxygen required for life.
- .
- The visual quality of a landscape is improved by planting trees, which, in turn, improves the quality of life. The greenery of trees adds color to the landscape and enhances the picturesque beauty of the environment.
- Trees control the climate by moderating the effects of sun, wind, and rain. They can help prevent severe floods, landslides, and wind damage. Trees moderate flood hazards by allowing the rainwater to percolate into the soil instead of running over it.
- Trees reduce soil erosion. Their roots bind soil that would otherwise wash away in rainstorms and floods. Trees also help improve the fertility of soil. Rich soil transfers nutrients to food, which contributes to human health.
- Trees are great absorbers of noise. Noise pollution can be reduced to a great extent by planting more and more trees.
- The demand for clean drinking water can be met by planting indigenous trees. Forests and plant cover naturally slows the runoff of rainwater and filters it into the soil. Once slowed, rainwater seeps down to refill underground aquifers we depend on for our use. Trees also shade rivers, keeping water cool, and slowing its loss through evaporation.

3. Mahuthiro ma mwaki wa riko ta Cookstoves.
4. Ugitiri wa tiri ta kumenyerera tiri ukirima.
5. Na mangi mainigi.

TIST mahinda maya iraruta wira rungu rwa Afforestation, Reforestation (A/R) carbon project. Ngurubu ino irabatarania project kubanga uhandi wa miti mieru (afforestation) kana gucokia mititu (reforestation) kuria mititu yari kana kuria mititu yatheririo.

Hamwe na uguo, niguo mumemba wa TIST agie na mbeca cia Carbon Credits, no nginyagia tugie na mititu mieru (Groves) kuria kuri na migunda iria itari mihande (afforestation) kana kuhanda miti kuria miti itemetwo kana kuhanda kuria gutari kuhande (reforestation) matura-ini maria gutari mititu miaka 10 mithiru. Guthukuma na carbon credits rungu rwa category, guitarwo gwa carbon kuroragwo carbon iria irutagwo kuma riera-ini o uria miti irakura.

Kurikiriria, niguo miti ihituke ya A/R carbon credits, ubatie kuhanda miti mieru riria waingira TIST. Oro hau, wambiririe githaka kieru, githaka kiri na miti mieru.

Ni wega kumenya ati TIST ihuthagira atari kuma mabururi ma njia (international verifiers) aria matigagirira ati mitaratara rungu rwa Afforestation, Reforestation (A/R) ni rwamirirwo. Umuthi, techonology ni ithiete na mbere muno ati andu mari thi cia kuraya no mamenye riria miti yaku yahandirwo. Murimi umwe anginyitikana ahenanitie, TIST yothe igiaga na thina.

Kwa uguo, rekei tuikare turi ehokeku, tukiaria uhoro wa ma na waragania thiini wa TIST oro hamwe na maundu ma oro muthenya. Riria muruti wira wa Clasta uka mugunda-ini waku, rekei mamenye ukuru wa miti yanyu. Angikorwo kuri yahandirwo mbere ya kuingira ngurubu nini rekei TIST imenye, na niigukorwo iri **miti ya kiambiriria**. TIST riu ni irathugunda kurora kana miti ya kiambiriria no ituike ya guitarwo thiini wa carbon credits. Ni tukumumenyithia oro uria tuguthii na mbere!

Ithui othe ni tuguteithia arimi a TIST kumenya uhoro wa biacara ya Carbon.

TIST is an innovative, time - tested, afforestation program led by the participants.

TIST: Semina ya Viongozi wa Cluster iliyofanyika Machi 24 - 28, 2025 Ruiru, Kenya.

TIST: Kikumbusho Muhimu - Vikundi Vipyta, Vichaka Vipyta, Miti Mipyta.

Wakulima WAPYA wanapojiunga na TIST, mara nyingi huuliza kama miti yao iliyopo kwenye mashamba yao itahesabiwa kama Miti ya TIST kwa biashara ya Kaboni. Jibu la hili **BADO!** Hivi sasa - Miti Mipyta inapaswa kuwa na Miti Mipyta.

Miradi ya kaboni ni mipango iliyoundwa ili kupunguza, kuepuka au kuondoaa utoaji wa gesi joto (GhG) kutoka angahewa. Katika baadhi ya matukio, miradi hii hutoa **mikopo ya kaboni** ambayo inaweza kuuzwa kwa kufuata sheria na masoko ya hiari na kupata mapato/mapato ya mradi.

Kuna kategoria nyingi za miradi tofauti ya kaboni. Mifano ni:-

1. Upandaji miti, upandaji miti upya (A/R) mradi wa kaboni – TIST.
2. Kupunguza Uzalishaji wa hewa ukaa kutokana na Ukataji miti na Uhreibifu (REDD+).
3. Miradi ya Ufanisi wa Nishati kama vile Cookstoves.
4. Kuondoaa kaboni ya udongo k.m. kupitisha Kilimo Hifadhi.
5. Na mengine mengi.

TIST kwa sasa inafanya kazi chini ya mradi wa kaboni wa Upandaji miti, Upandaji miti (A/R). Kundi hili linahitaji mradi kupanda miti MPYA (upandaji miti) au kurejesha misitu (upandaji miti) katika maeneo ambayo hapo awali misitu haikuwapo au kuharibiwa.

Kwa maneno mengine, ili wanachama wa TIST wapate Mikopo ya Carbon, wanahitaji kuanzisha misitu mipyta (Groves) kwenye

ardhi isiyo na misitu (upandaji miti) au kupanda tena miti katika maeneo yaliyokatwa miti au yaliyoharibiwa (upandaji miti) katika maeneo ambayo hayakuwa msitu katika kipindi cha miaka 10 iliyopita. Ili kupata mikopo ya kaboni chini ya kategoria hii, hatua za Uhasibu wa kaboni huangalia kiasi cha uondoaji wa kaboni kutoka angahewa miti inapokua.

Kwa muhtasari, ili Miti yako ifuzu kwa salio la A/R la kaboni, unapaswa kupanda miti mipyta unapojiunga na TIST. Katika maelezo sawa, ukianzisha TIST Grove mpya, Grove hiyo inapaswa pia kuwa na miti mipyta.

Ni muhimu kutambua kwamba TIST hukaguliwa na Wathibitishaji wa kimataifa ambaa lazima wahakikishe tunafuata sheria chini ya mbinu ya Upandaji miti, Upandaji Misitu (A/R). Leo, teknolojia ya ulimwengu imeendelea sana hivi kwamba watu katika mabara ya mbali wanaweza kujua wakati miti yako ilipandwa. Ikiwa mkulima mmoja atakamatwa akidanganya, TIST yote huathirika.

Kwa hivyo, hebu sote tubaki Waaminifu, Sahihi na Wazi katika TIST yetu na shughuli nyingine za kila siku. Mtumishi wa Nguzo anapotembelea shamba lako, wajulishe umri Sahihi wa miti yako. Ikiwa baadhi yao yalipandwa kabla ya Kikundi Kidogo kujua kuhusu TIST, itachukuliwa kuwa **Miti ya Msingi**. TIST sasa inafanya kazi kukuza uwezo wa kuwa na Miti ya Msingi pia kuhesabiwa kuelekea mikopo ya kaboni. Tutaendelea kuwajuza kadri tunavyopiga hatua!

SOTE tunapaswa kuwasaidia wengine Wakulima wa TIST kuelewa Biashara ya Carbon.

Uongozi na Utawala katika Cluster yako.

TIIST ina zaidi ya cluster mia moja na themanini. Katika kila Cluster, viongozi watumishi husaidia katika mafanikio yetu na hugawana nguvu zao nasi. Kila cluster inaa utawala na uongozi kama ifuatavyo:

Viongozi wa cluster waliochaguliwa,

- Kiongozi wa cluster.
- Msaidizi wa kiongozi katika cluster.
- Mwajibikaji wa cluster.

Uchaguzi wa Cluster inafaa na nilazima kwa TIST Clusters. Kiongozi, msaidizi wake na mwajibikaji wa cluster hutumika katika kila nafasi kwa muda wa miezi mine. Baada ya miezi mine ya kutumika, kiongozi wa cluster hutoka uongozini. Msaidizi wake huingia kuwa kiongozi naye Mwajibikaji huwa msaidizi wa kiongozi. Wanawake na wanaume huzungukana katika uchaguzi-kama mwajibikaji ni mwanamume, huyo mwingine atakuwa mwanamke. Cluster yako yafaa kuchagua mwajibikaji mpya kwa njia ya kidemokrasia. Uchaguzi wa cluster ni muhimuna wa lazima kwa cluster zote za TIST.

TIST: Mbinu za vikundi vidogo: Mwingiliano wa kikundi.

a) Ni njia gani bora zaidi ya kuwapanga watu wakati wa mukutano wa Kikundi kidogo?

Msiwe na meza kwa sababu inajenga vizuizi kati ya watu. Msiwe na kiti cha kukaliwa na mtu aliye na muhimu zaidi kati yenu. Katika TIST, sote twaketi kwa njia iliyofanana. Sote hukaa chini udongoni au sote kukalia viti.

b) Mtafanyaje kukiwa na watu zaidi ya kumi na wawili wanaotaka kuijunga na kikundi chenu?

Kama kuna zaidi ya watu kumi na wawili wanaotaka kuijunga na kikundi chenu ni vizuri zaidi kuanzisha kikundi kipy. Kikundi chaweza kujigawanya na kuwa vikundi viwili, ama wanakikundi asili watatu au wanne wawe msingi wa kikundi kipy. Hii ni vizuri kuliko mwankikundi mmoja kujaribu kuanzisha kikundi peke yake. Kumbuka kuanza uongozi wa mzunguko kutoka mwanzo.

c) Ni mbinu zipi mwaweza kutumia ikiwa nishati ya kikundi iko chini?

Gawanya kikundi kiwe wawili wawili na uulize kila joji kujadiliana kuhusu kazi iliyopo. Michezo ya kuigiza husaidia pia. Mara kwa mara kuwasimamisha na kila mtu kusema kitu kizuri ambacho kikundi chao kinafanya husaidia kuwapa watu motisha nyingine. Pia kumbuka kuuachisha mukutano usiwe mrefu. Kwa njia ya kuwa na msaidizi wa kiongozi anayesaidia kuweka masaa, unaweza kuelekeza nishati ya kikundi kuhakikisha kazi inafanya katika muda uliopangiwa.

Ratiba ya mukutano.

Kutumia muda vizuri, kikundi kidogo chapaswa kuwa na ratiba ya mukutano iliyopangika vizuri. Hii ni muhimu kwa sababu itakusaidia kuzingatia yaliyo katika ajenda na mambo yaliyo muhimu zaidi. Ni muhimu pia kwa sababu katika TIST, tunajitolea kufanya kazi pamoja kwa muda mrefu ili kukua na kudumisha miti yetu katika soko la hewa. Tunahitaji kujua wanakikundi wenzetu vizuri, kwa sababu matendo ya kila mtu hushikilia kikundi chote na TIST yote.

Ni muhimu pia, kwa kikundi chako kidogo kuwa na mikutano ya mara kwa mara, ikiwezekana mara moja kila wiki au mara moja kila wiki mbili. Hili litawapa wanakikundi chenu nafasi ya kuimarishe kikundi na

kugawana na kujifunza mafunzo mapya.

Wakati wa mukutano, ni muhimu kuzingatia mambo yaliyo muhimu. Vikundi vingi vya TIST vimeona utaratibu unaofuata ukiwa mwenendo bora zaidi ili kuwa na mikutano ya kufanikiwa:

Hatua ya kwanza. Salamu na kujijulisha kwa wanakikundi wapya (dakika tano kufika kumi na tano): Hakikisha kila mtu anajisikia nyumbani. Hakikisha ni fupi lakini muache kila mtu ajijulishe.

Hatua ya pili. Maombi ya kuanza (Dakika mbili):

Ombi fupi laweza kusaidia kuunganisha kikundi.

Hatua ya tatu. Nyimbo (Dakika tano):

Hizi zaweza kuwa zilizoandikwa na kikundi chako, au nyimbo zinazowatia watu nguvu kama nyimbo za kidini.

Hatua ya nne. Kuitikiana kuhusu kazi na masaa (Dakika tano):

Kiongozi anaeleza yatakayofanyika mukutanoni na wanakikundi waitikie kufanya kazi hiyo. Masaa yatakayotumika kwa kazi hiyo au mjadala yakubalianwe ili msaidizi wa kiongozi aweze kuweka masaa ya mukutano.

Hatua ya tano. Kazi ya vikundi (saa moja): Ili kufanya vizuri zaidi, kazi yapaswa kujadiliana mukutano wa mwisho ukiisha. Kazi zaweza kuwa pamoja na kugawana ni nini kila mtu amefanya ili kusaidia kazi za TIST, kugawana mienendo bora zaidi ya kufanya mambo tofauti, kufunza kuhusu vitu fulani na jambo lingine lolote la maana litakalosaidia kikundi chenu kukua .

Hatua ya sita. Kujengana (Dakika tano):

Kila mwana kikundi anasema jambo moja nzuri kwa kiongozi wa wiki hiyo kuhusu uongozi wake ulioonekana katika mukutano. Kuongezea, mtu yeoyote aweza kusema ni zawadi gani katika uongozi ameona katika kiongozi huyo.

Hatua ya saba. Ombi la kufunga (Dakika mbili):

TIST: Miti huboresha mazingira kwa ajili yetu sote.

Katika TIST, sisi hupanda miti ili kuijingga katika soko la hewa na kupata mapato kutokana na kuuza hewa hii. Hata hivyo, faida zingine za miti ni kubwa!

Zifuatazo ni faida chache ambazo sisi (pamoja na dunia yote) hufurahia:

- Miti hutumika kama makazi asili ya kusaidia aina nyingi za mimea na wanyama. Hupeana faragha na usalama kwa wanyama wa pori wanaotafuta makazi mitini na huwapa chakula. Kulinda bionuwai au viumbe hai hufanya mashamba yetu na sayari yetu kuwa yenye uzalishaji zaidi na pingamizi dhidi ya mabadiliko ya tabianchi(hali ya anga ya muda mrefu) na changamoto nyinginezo.
- Miti huboresha hewa na hupunguza uchafuzi wa hatari. Miti hutoa hewa ya kaboni ya ziada na vichafuzi vya hewa kama dioksidi sulsuri, ozoni na naitrojini yenye oksidi. Kurudisha, hutupa oksijeni inayohitajika kuishi.
- Ubora unaoonekana wa ardhi pia unaboreka kwa kupanda miti ambayo, inaboresha maisha. Rangi ya kijani ya miti huongeza rangi kwa ardhi na kuongeza urembo wa kipicha wa mazingira.
- Miti hudhibiti tabianchi kwa njia ya kupunguza athari za juu, upemo na mvua. Yaweza kusaidia kuzuia mafuriko kali, miporomoka ya ardhi, uharibifu wa upemo. Miti hupunguza madhara ya mafuriko kwa kuruhusu maji ya mvua kuingia udongoni badala ya kupita juu yake.
- Miti hupunguza mmomonyoko wa udongo. Mizizi yake hushika udongo ambao badalayake hungebebwa wakati wa dhoruba za mvua na mafuriko. Miti pia husaidia kuboresha rotuba ya udongo. Udongo wenye rotuba huhamisha virutubisho hadi kwa chakula, jambo ambalo huchangia kwa afya ya binadamu.
- Miti ni mizuri katika kunyonya sauti. Uchafuzi wa kelele waweza kupunguzwa sana kwa kupanda miti mingine na mingine.
- Mahitaji ya maji safi ya kunywa yaweza kukamilishwa kwa njia ya kupanda miti ya kiasili. Misitu na mimea hupunguza kasi ya maji ya mvua na huyachuja yanapoingia udongoni. Yanapopunguzwa kasi, maji ya mvua huingia ardhini kujaza vyanzo vya maji vilivyo chini ya maji na ambavyo tunategemea ili kuishi. Miti pia huipa mito kivuli, na kuyaacha maji kukaa baridi na kwa hivyo kupunguza kasi ya kupotea kwa maji kwa njia ya uvukizi.
